

WindoPath®

EMR Internet Interface

WindoPath is a highly advanced, full-featured and easily customizable anatomic pathology system designed in collaboration with pathology professionals to meet the specific needs of the pathology lab. WindoPath sets the bar for AP system functionality by addressing new requirements as they arise.

Psyche Systems has developed an easy-to-use EMR module. With a dynamic, internet interface between facilities, physician groups, hospitals, offices, etc. – users are able to facilitate automated processing of tests, search for orders, view and save results. Communication to, and from, WindoPath occurs over the Internet for sharing with any commercially available electronic medical records information system. Information is exchanged using standard industry file formats including HL7, XML and PDF.

All of this through secure, web access – at less than half the cost of other industry EMR interfaces!

EMR Features Include:

- » Automated processing of orders
- » Secure, web-based access from the comfort of the physician's office
- » Easy, searching and storage of results
- » Easy, rapid integration to your customers' EMR – at half the cost

Psyche Systems' WindoPath® anatomic pathology information system ranked #1 among all anatomic pathology software solutions surveyed according to the 2010 Top 20 Best in KLAS Awards: Software & Professional Services report*.
